2015 CORPORATE HSE BUSINESS PLAN

MD's Message

"2014 proved a challenging year on several fronts with mixed but overall disappointing HSE results, notwithstanding the tremendous work by so many in PDO and our contracting communities. We need and must improve our HSE performance in 2015 as a result of key learnings and new ways of working that we have embedded into our 2015 HSE Plan.

The focus for 2015 will be to focus and simplify our efforts, to do less but do far better, building on our Lean efforts, whilst continuing to champion the Golden rules of Compliance, Intervention and Respect. If these are rigorously implemented by all, a step change in our HSE performance is achievable.

Beyond our Golden Rules, the Life Saving Rules continue to provide the working platform we all must rely on and comply with. I call and seek from all PDO and contractor staff to maintain and honour their commitments to these simple and effective rules and to work together to improve our safety, occupational health and environmental performance."
