

# MR. MUSLEH's NEWS

Welcome to issue No. 4 of *Mr. Musleh's News*, the communication which provides a 'one stop shop' for you to receive learnings from incidents in PDO and the oil and gas industry.

This month Mr. Musleh will summarise the learnings from incidents of the lost time injuries (LTIs) that have occurred during May 2015.

You can browse the incidents in the newsletter which have been designed to be read in an easy to digest format and delve deeper into the learning's if you think the incident or learning is relevant to you.

Please disseminate this bulletin to your teams and use it in your tool box talks, HSE meetings and notice boards.

- Rig support leg traps finger
- Technician breaks arm
- Shortcut leads to dislocated knee

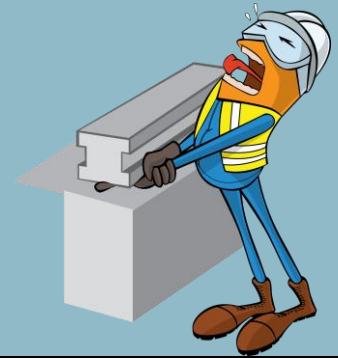

### Rig support leg traps finger

During rigging-up the work floor, the support legs were being lifted by winch using a tigger line. The Derrick man was guiding the tigger line with his left hand. As the support leg was moved, it dropped slightly crushing his finger against the cat walk resulting in a fracture of the tip of his finger.

### Technician breaks arm

After completing rigging down the top section of the scaffolding, a technician began removing a plank (1m section of scaffolding grating). When he tried to push the plank up with the hammer and his hands, he slipped and fell on to the xmas tree and hit his hand against the xmas tree suffering a fracture to his upper right arm.

### Shortcut leads to dislocated knee

While trying to fill the hoist diesel tank from a diesel drum on a forklift forks the mechanic climbed over the barrier standing with one foot on the forks and the other on the hoist. As he tried to roll the drum he felt dizzy and fell 1.2m to the ground dislocating his right knee.
