

## Fatal accident in HHI Shipyard Falling from height

1. Time:11:40AM Date: Jan 11, '04
2. 2 workers killed and 3 workers injured.
3. 5 workers (scaffolding worker; Sub-contractor) were erecting scaffold at a height of 50 meters for an offshore jacket project.

After completing the morning session, the five scaffolders were going for lunch and were being lifted down in a riding basket that was designed for moving scaffolding components and erection works. At approximately 39 meters the basket hit handrails and flipped over. All 5 workers were thrown out from basket. Unfortunately, 2 workers were not using a safety harness and fell 39 meters to the ground below. The other three workers had their safety harnesses secured and were left hanging from the basket until the basket could be safely lowered to the ground.

4. Both scaffolders suffered fatal injuries as a result of the incident.

### The handrail damaged by hitting basket
