

Multiple Fatality :

19th June 04

While returning to a seismic crew at 00:30 on the 19th June. Two employees in a Honda civic collided with a 3rd party pickup on a straight road, approximately 30km southwest of Ibri. All three people involved in the incident were killed.

Key Issues :

The incident appears to have been caused by the 3rd party veering onto the wrong side of the road.

•Contributory factors:

- Using private vehicles outside work hours
- Driving long distances after work and at night
- Fatigue
- None of those involved were wearing seat belts
