Introduction About IFADAH

In alignment with **PDO's Digital Transformation journey**, we are pleased to introduce **IFADAH**, an integrated HSE management platform built on the robust Sphera Cloud infrastructure. This innovative solution provides a holistic view of incidents, action management, and analytics, significantly enhancing our operational safety and efficiency.

IFADAH leverages Sphera Cloud's advanced features, including predictive analytics, mobile accessibility, automated workflows, and risk intelligence, to deliver scalable, secure, and compliant HSE solutions tailored to the evolving needs of PDO. By ensuring that critical information reaches the appropriate stakeholders promptly, the platform empowers proactive risk management and supports continuous improvement throughout our organization.

This initiative underscores PDO's commitment to fostering a culture of safety and excellence, positioning us at the Leaders of digital innovation in Oman industry.

The IFADAH Application Functionality

The **IFADAH** Application Functionality includes:

- Integrated **4 applications** (PIM, IHTIMAM, NEAR MISS and Hazard Hunt) in one.
- IFADAH first report allows anyone to report. (**e.g Contractor and third party**).
- The ability to **Report Anonymously** is available via **IFADAH First Report**.
- **HSE Virtual Help functionality**
- The module supports a **Location Hierarchy Sub site**.
- The system includes an **Organization Hierarchy (section)**.
- Add the **directorate focal point** to the event
- **Incident/Near Miss** progressing by **Responsible supervisor**.
- Event Can be invalidated by Responsible supervisor (In-Review Stage)
- **Observation progressing** to Close immediately after report with allowing to add action if required.
- Users can **Add action**.
- The module provides **Consequence SME visibility**.
- Users can **Add Investigation**, which is also **simplified**.
- The system allows users to **Run Report**.
- Users can **Schedule report**.
- **Analytics** are available.
- **LFI** (Lessons From Incident) functionality is supported.
- **LFI Action Item** features **Can be customized**.
- A **Library** is included.
- **User Home screen customization** is available.
- **Support analytics**
- Possibility to Close Events with Open Actions
